ABOUT

Motivated Computer Science student specializing in Artificial Intelligence and Machine Learning, with a strong foundation in programming and data analysis. Proficient in Python, C, and Java, and experienced in developing machine learning models using libraries such as NumPy, Pandas, Scikit-learn, and TensorFlow. Skilled in applying data-driven techniques to solve real-world problems through academic projects. Eager to contribute technical skills, learn emerging technologies, and grow in the field of AI and Data Science.

SKILLS

- UI and UX design
- Machine learning
- Software development
- Performance analysis
- Web application development
- Teamwork and collaboration

EXPERIENCE

STUDENT SOFTWARE DEVELOPER 01/2026 to Current
Symbiosis Institute of Technology,Nagpur, Nagpur, India

- Developed and tested basic software and machine learning models as part of academic projects.
- Worked with programming languages like Python, C, and Java for problem solving and application development.
- Implemented machine learning algorithms for tasks such as classification and data analysis.
- Collaborated with classmates to design and develop small software applications.
- Used tools like VS Code, Git, and Jupyter Notebook for coding and project management.
- Continuously learned new technologies related to Artificial Intelligence.

EDUCATION

Bachelor of Science : Computer Science, **Expected in 06/2028**
The Swaminarayan School - Nagpur, India

MY WORK

• Developed an AI-based Real-Time Visual Tracking System for CCTV surveillance that detects and identifies registered and unregistered individuals using facial recognition techniques. • Conceptualized CyberRakshak, an AI-powered mobile security application designed to protect users from digital scams such as fraudulent calls, fake QR codes, and malicious applications. • Currently developing Train Buddy, a skill exchange platform that enables users to share and learn skills through live sessions, chat features, and collaborative learning opportunities. • Contributed to project research, system design, and basic development using programming and database concepts while working collaboratively in a team environment.
